

CWEMF 2022 Annual Meeting (April 4) Session 1

California Water Plan Update 2023:

Building the State's Water Resilience

- **Present overview, approach, and interim products for California Water Plan Update 2023.**
- **Building on prior updates and with the Governor's Water Resilience Portfolio as a cornerstone, Update 2023 will emphasize climate vulnerability assessment and multi-sector watershed planning to assist regions to evaluate, implement, and track multi-benefit projects for sustainability and resilience.**

Presentation 1: What is California Water Plan Update 2023 and how does it relate to the Water Resilience Portfolio?

- Lewis Moeller, California Department of Water Resources

Presentation 2: Watershed Resilience

- Eric Tsai, California Department of Water Resources

Presentation 3: Future Scenarios: Does California Have Enough Water to Survive to 2070?

- Paul Shipman and Mohammad Rayej, California Department of Water Resources

Presentation 4: Performance Tracking – How do we know we are achieving a more resilient and sustainable future?

- Jason Sidley and Eric Tsai, California Department of Water Resources
